

SPECIFICATION AMENDMENTS:

Amend paragraph 0048 as follows:

[0048] With reference to FIGS. 4A and 4B, in this modification, the locking device 6 has a zipper structure in which locking portions 6a provided on the attachment member 4 are formed into hooks and engaging portions ~~6a~~ 6b provided on the ~~attachment~~ base member ~~4~~ 3 are formed into hooks engageable with the hooked locking portions 6a in order to enable the base member 3 to be attached to the attachment member 4 in one operation. By taking the zipper structure, the locking device 6 of this modification can detachably lock the base member 3 in the attachment member 4 by successively engaging the locking device 6 from one end thereof.
